

IF I ONLY KNEW...

- ...THAT A PORT WAS **OPEN TO HACKERS**
- ...THAT WE **HAD A WEAKNESS** IN OUR .NET APPLICATION
- ...THAT OUR WEBSITE WAS **NOT WELL PROTECTED**
- ...THAT OUR IT SECURITY POLICY WAS **NOT BEING FOLLOWED**

WHY VIRTUAL GUARDIAN?

Virtual Guardian is an IT consultancy firm specialized in IT security and who's mission is to preserve your data's confidentiality, integrity and availability at all times. Since 2003, our team of experts have dedicated their work to protecting your informational assets. Being accredited with most of our industry's certifications, **Virtual Guardian** can help you identify and eliminate but also prevent against threats that can affect your day to day operations. Maximize your IT security investment by letting us put our expertise to work for you.

OUR REPUTATION

 - La Survivance
- And many others...

FIRST IN CANADA

CISSP, CISA, CGEIT, ITIL and GIAC are but some of the usual industry-recognized accreditations held by **Virtual Guardian**. We are however, the first IT consultancy firm in Canada to obtain the ISO 27001 certification, the highest security accreditation level in the industry. At **Virtual Guardian**, we don't just preach about the industry's best practices, we apply them on a daily basis! Furthermore, our team of experts also follow the DRIL, NIST and CERT/CC best practices and our risk analysis and security testing methodologies are based on OCTAVE and OSSTMM protocols.

SERVICE OFFER

SIMPLICITY

Our reports are not copy-pasted results taken directly from a software's output program. **Virtual Guardian** will always produce a simple to read custom-written report, in English or French. Furthermore, your **Virtual Guardian** consultant will always take the time to go through the report with you and answer any questions you may have.

IMPARTIALITY

Virtual Guardian does not resell or endorse any IT products or services and we are not affiliated with any other company. This translates into honest and impartial evaluations and reports.
